

Kostas Raptis holds a PhD from the Department of History and Philosophy of Science, National and Kapodistrian University of Athens (NKUA). He received his PhD in 2024; his dissertation was titled *"The integration of computers in medical technologies and the concept of death"*. He was awarded a full doctoral scholarship by the State Scholarships Foundation of Greece (IKY). He received his Bachelor's degree from the same department in 2012 and his Interuniversity Master's degree "History and Philosophy of Science and Technology" from the National Technical University of Athens and the National and Kapodistrian University of Athens in 2014. Since May 2024, he has been working continuously as a Postdoctoral Researcher, initially at the Department of History and Philosophy of Science (NKUA) and currently at the Department of Sociology, University of the Aegean. His research focuses on the history of (digital) computing, medicine and biology, and the history of death, drawing on interdisciplinary perspectives from the history of science and technology, the field of Science, Technology, Society (STS) and cultural history. He has presented his research at numerous national and international conferences.
